**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Chad W. Miller on 2/3/2005.

The application has been amended as follows:

In claim 30 line 12, the subject matter "a feedback signal" has been changed to – the feedback signal--.

***Allowable Subject Matter***

Claims 1-48 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1-48 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims including one or more ELFEXT filters configured to process the intermediate signal to create one or more outgoing FEXT cancellation signals, as specified in claims 1 and 19;

a first device configured to receive a second cancellation signal from the second receiver and combine the second cancellation signal with the first feedback filter loop output; a first filter configured to receive at least the decision device output and generate a first cancellation signal, as specified in claim 12;

receive one or more incoming cancellation signals from other receivers in the multi-receiver system; and process the one or more incoming cancellation signals, the first filtered signal, and the received signal to cancel unwanted coupling in the received signal, as specified in claim 24;

combining the processed signal with at least a first cancellation signal received from at least the second receiver to create a feedback signal; combining the feedback signal with the first combined signal to create a second combined signal, as specified in claim 30 and 41;

means for receiving and combining the filtered signal and one or more cancellation signals received from other receivers in the multi-channel communication device, as specified in claims 36, 46.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
